

# **CP-NX** SERIES Ultracentrifuge

# Ultracentrifuge

### CPIOONX / CP9ONX / CP8ONX

## Truly User-friendly Design

### LED Indicator – Operation status is at a glance !

LED Indicator of 47cm length is mounted in front of table. This indicates its operating status by selectable light in colors, luminous patterns, and levels of brightness. So operating status is at a glance with this LED Indicator. These are :

#### Status of operating:

Stop, acceleration, running at set speed, deceleration, vacuum holding, economy mode, acceleration in zonal mode, deceleration in zonal mode, or alert.

Color:

Blue, red, green, light blue, yellow, white or pink

Brightness:

Three levels

Luminous pattern: Solid lighting, slow and fast blinking, or fading

\* Actual color of LED Indicator may be different from the photos on this information, brochure and website due to printing conditions.

### Touch-sensitive LCD panel with intelligible screen design

The control panel, 6.5-inch size touch-sensitive color LCD panel, is located in a front part of the machine. You do not need to stretch your arm to operate the centrifuge. The intelligible screen designs, such as a wide indication of basic parameters, many icons for selecting function, folder colors with each symbol for program management, offer user-friendly operation, like operating a smart phone, to all users.

### **Multilingual Display**

You can select a language from 11 languages, English, German, French, Spanish, Italian, Portuguese, Nederlands, Russian, Chinese (simplified), Korean and Japanese.

### Low table height with smooth sliding door for easy loading / unloading the rotor

The table height of the CP-NX is 863mm. The low table height enables users to load / unload the rotor easier. The rotor is automatically locked by the centrifugal force once the rotation is started by the "self-locking rotor system". So it is not necessary to fix the rotor by screwing the rotor onto the drive shaft or push the button to lock/unlock the rotor any more. In addition, the improved door structure design based on the latest structure analysis technology makes the door thickness 5mm thinner than the one of our former model. The lighter door offers the same protection as the before and makes door-sliding movement (back and forth) smoother than before.

### Advanced Technologies, Features & Functions

### Automatic Rotor Life Management System

Automatic Rotor Life Management System, RLM automatically manages an operating record of a rotor to accumulate totals of run times and operating hours by each rotor.

RLM rotor has a magnetic memory on its rotor itself as RLM Adapter. This system is original only for himac; the memory is read out and over-written by RLM sensor with a himac ultracentrifuge.

himac ultracentrifuge reads out a record of run times and operating hours of rotor from its memory during acceleration to accumulate the both times and hours by RLM adapter and sensor. While the rotor decelerates, the totals of the run times and hours are accumulated and updated by centrifuge, the latest accumulated record are overwritten into memory on RLM adapter of the rotor.

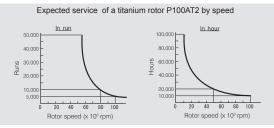

Though a RLM rotor installed on and run by himac's another centrifuge with RLM system, an operating record of a RLM rotor is kept as the rotor's latest of the accumulated running run times and hours. Because the accumulated record is always updated and overwritten into memory of RLM rotor.

### Longer service of Rotor

Automatic Rotor Life Management System tracks a rotor running precisely in times and hours. It is more accurate than management manualy by the rotor log book and its conventional calculation.

When a rotor runs lower speed than the maxiumum, and furthermore, its running time is less than an hour, this RLM system evaluates its accumurated record to be less than actual runnning in time and hour, corresponding its smaller load on the rotor. Consquently, the rotor's expected service is much longer in time and hour by this system, compared with management by log book.

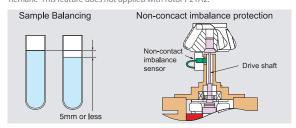

If a rotor speed is lowered from 100,000 rpm to 80,000 rpm by 20% less, its expected services are increased from 5,000 runs to 10,000 runs as a double.

If a rotor speed is lowered from 100,000 rpm to 50,000 rpm as a half, its expected service hours are increased from 10,000 hours to 20,000 hours as a double.

### Balancing by non-contact imbalance sensor

Easy to balance all the sample by balancing them within 5 mm among the all tubes and bottles to be set in a rotor. Non-contact imbalance sensor always monitors of both the rotor and shaft vibrating. When the both vibrate unusually, the centrifuge automatically stops the rotor. Remark: This feature does not applied with rotor P21A2.

### Economy mode\* for energy saving

Stand-by electricity consumption reduced to a half \*\*, compared with our former model, by deeming LCD backlight, stopping cool system and its fans when the control panel untouched over the set period in 1 to 180 minutes.

\* This economy mode works while drive unit and vacuum pump are stopped. \*\* Under in-house test condition

### Operating History : 5,120 logs

5,120 run histories recorded automatically and reuseable in user program. A run history exportable through USB interface in CSV format.

### Programmed Operation : 1,000 programs

1,000 use-programable operations with file folders in 4 selective color.

### User Administration with User Lockout

50 users can be classified into 3 levels in access: Administrator, Supervisor, and User, secured by passwords to enter log-in system for each access level and its functions.

#### Quiet operation

Operating noise level 51 dB(A) under running at maximum speed. As of Jan. 2014, under in-house test condition

#### Quick start-up

6 seconds and ready to operate system after power-on.

#### Faster vacuum

Evacuation time 15 minutes to reach high vacuum. The CP-NX series has reduced 5 minutes to reach the high vacuum, compared with our former model.

As of Jan. 2014, by our investigation No condensation in a rotor chamber before starting vacuum

### Intelligible Screen Design

I AN Communications To connect or disconnect LAN communications

Data Communication and Log Management Software

USB (device) x 1, USB (host) x 1 and LAN x 1 are equipped as an interface for the data communication. Operating histories, up to 5,120 logs, can be exported in CSV format through USB (host) port.

### himac LogManager ver. 5.0 for windows<sup>®</sup> (network edition) – optional log management software

himac LogManager ver.5.0 for Windows® (network edition) is a useful and convenient software to manage real-time operating log of himac CP-NX series, CP-WX series, CS150NX, CS150FNX, CR30NX, CR22N and CR7N. Maximum 16 units of the above-mentioned centrifuges can be registered to the software and monitored by the software at the same time. The software is installed into the PC and data communication between the centrifuges and the PC is done via LAN or Ethernet. You can easily establish the network configuration and relocation with commercially available LAN devices. (optional LAN board is required for himac CP-WX series, CS150NX, CS150FNX, CR22N and CR7N.) It means you can manage the operation log at the different location from the installation site of the centrifuges.

And along data	-
A. J. J. B. A. M.	
April 100 (2.4.10)	1.84

The software is real-time log management software; recording interval period is selectable from 10 seconds to 5 minutes. Of course, the software supports U.S. FDA 21 CFR Part 11, following functions are available;

**Digital Signature** Audit Trail Encrypted Data Files

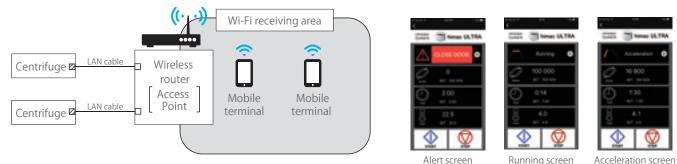

Required Operating System : Windows<sup>®</sup>8 and Windows<sup>®</sup>10

Windows®, Windows®8 and Windows®10 are registered trademarks of Microsoft Corporation in the United States and other countries Ethernet is a registered trademark of Xerox Corporation in the Unites States and other countries

### Remote monitoring System himac View

Remote monitoring application "himac View" is available for CP-NX series and CR30NX. "himac View" monitors, operates or stops a centrifuge with iPhone™ or Android <sup>™</sup> Phone via Wi-Fi®. Download "himac View" from Apple™ store or Google play™ "himac View" monitors up to 16 units of CP-NX or CR30NX in the LAN access network.

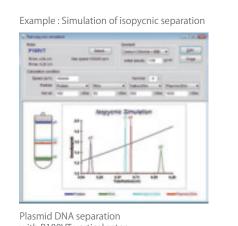

\*Apple and iPhone are trademarks of Apple Inc. Google, Android, and Google Play are trademarks of Google Inc. Wi-Fi® is a registered trademark of Wi-Fi Alliance. Windows® is a registered trademark of Microsoft Corporation in the United States and/or other countries.

### Simulation Software "himac ASSIST" – centrifugation simulation software

himac ASSIST is simulation and calculation software of centrifugal condition and can be installed in your Window®-based PC. CD-ROM of the himac ASSIST is included in the standard accessories. You can simulate whether the centrifugal condition is appropriate before the centrifugation, also can simulate optimal centrifugal condition of a sample, based on your CP-NX series ultracentrifuge and rotor.

himac ASSIST has following functions;

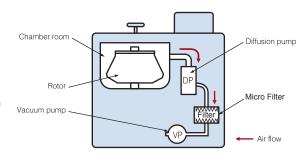

Calculations of K-factor and pelleting time Calculation of the allowable rpm with high-density liquid Rate zonal centrifugation simulation Isopycnic centrifugation simulation Solvent concentration conversion Mutual conversion of molecular parameters Rotor database

with P100VT vertical rotor CsCl+EtBr : initial density = 1.55g/ml Speed : 100,000rpm

The biosafety is always priority in laboratories. In order to prevent from exhausting bio-hazardous sample into a room, a Micro filter can be assembled in a vacuum line at option. For details, please contact us.

### Specifications

specifications	
Model	P21A2
Max. Speed	21,000 rpm
Max. RCF	71,000 xg
K-factor at max speed	486
Nominal Capacity	230 mL x 6 tubes
Angle of tube cavity	26 degree
Rotor Weight	11.4 kg
Accessory included	6 pairs of 230PA Bottle and Cap
Part No.	9123171M
Applicable centrifuges	CP-NX, CP-WX and CP-MX series*

Note: Visual balancing of sample surface difference is within 2mm between the all tubes for rotor P21A2.

Description	Quantity	Parts No	Remarks	
230PA Bottle	10 bottles	336621A	Excluding cap.	
AL Cap (2)	2 caps	S413248B	Exclusive cap for rotor P21A2 and 230PA Bottle. Including O-ring.	
O-Ring	10 rings	S401809A	As a spare of AL Cap (2)	

Remarks :

\* To use these new rotors with himac former ultracentrifuges, CP-WX or CP-MX series, ROM in CP-WX or CP-MX series may be exchanged based on its manufacureing number. Please inform us model name and the number of your ultracentrifuge to check if the ROM should be exchanged or not before placing the rotor.

Remarks

Remarks
1) \* Tubes, caps and adapters are excluded in the standard accessories. Please order them separately.
2) † The rotor is made-to-order item.
3) \*\*: Rotor PS0AT4 has cavities located in outer and inner. See its cross-area. K factors are 32 for outer and 38 for inner.
4) \*\*\*: Rotor PS0AT4 has cavities located in outer and inner. See its cross-area. K factors are 32 for outer and 38 for inner.
4) \*\*\*: Optional bucket (P/N 347607A : 16Ti Bucket Assy) is available for nominal capacity 16ml x 6 tubes.
5) Carbon fiber rotors cannot be used with CP-NX series.
6) \*\*\*\*: To use P32CT with CP-NX or other former models, optional accessory assy is mandatory required (sold separately).
Part number of the optional accessory assy for CP-NX series is S205643A, part number of the optional accessory assy for CP-MX and CP-MX series is S205643C.
7) Rotors with model names including the letter T are made of titanium alloy.
All buckets for swinging bucket rotors are made of titanium alloy.
8) To use zonal rotor model P32ZT, seal attachment assy model RPZ-S (P/N 91130600) is required. (order separately)
9) When using a seal tube in the above rotors, tube sealer and respective tube rack are required. (order separately)
10) Capacities of tube and bottle show their nominal. Actual capacity may not be the same to its nominal, depending on rotor structure, tube shape.

### S-Cap Series

himac original S-cap series offer simple and easy operation of the tube cap for open-top (thin-walled) tubes. The unique system requires just three components and three steps to assemble the cap to the tube.

- \* No consumables, such as O-ring
- \* Easy cleaning

Three assembling steps

- 1. Fill sample into the tube up to 80% volume and insert aluminum, AL Stem into the tube by the tool.
- 2. Assemble titanium, Ti Ring on the tube and tighten AL Stem and Ti Ring by the tool.
- 3. Fill the sample into the tube by an injector and close stem by Setscrew.

### Tube Sealer model STF3

The STF3 is heat-welding tube sealer to use the seal tubes with fixed angle rotors, vertical rotors and neo angle rotors.

#### Features

- ◇ Easy & Simple Usage
- 1. Set seal tubes in the appropriate tube rack then set the tube rack on the rack guide of the STF3.
- 2. Adjust position of the tube rack in order the tube inlet comes under a heater of the STF3.
- 3. Pull the handle down to contact the heater the tube inlet and hold the handle for 1 to 2 seconds. Then pull the handle down to the end and wait until the HEAT Lamp goes off. (It takes about 40 seconds.)
- $\bigcirc$  CE Marking complied.
- $\bigcirc$  HEAT Lamp indicates the status of the heater.
- $\bigcirc$  Tube racks are compatible with our former model STF2.

### Tube Rack (sold separately)

Description	Tube Size
Tube Rack (G2)	1.5PA seal tube
Tube Rack (G)	2PA seal tube
Tube Rack (B2)	3.5PA seal tube
Tube Rack (B3)	4PA seal tube
Tube Rack (B)	5PA seal tube
Tube Rack (B4)	6.5PA seal tube
Tube Rack (C2)	8PA seal tube
Tube Rack (C)	12PA seal tube
Tube Rack (E)	40PA seal tube
Tube Rack (F2)	94PA seal tube
Multi Rack*	
	Tube Rack (G2) Tube Rack (G) Tube Rack (B2) Tube Rack (B3) Tube Rack (B4) Tube Rack (B4) Tube Rack (C2) Tube Rack (C) Tube Rack (E) Tube Rack (F2)

\* For 2, 4, 5, 6.5, 12 and 40PA seal tubes.

\* Tubes sold separately as optional.

Disassemble procedure after the centrifugation.

- 1. Remove Setscrew and withdraw 20% supernatant from the center hole of AL Stem by the injector.
- 2. Remove Ti Ring to downwards manually.
- 3. Connect tube setter into the center hole of AL Stem and remove the AL Stem by moving the tube setter left and right slowly and gradually pulling up AL Stem.

Part Number	Descriptions	S-Cap	Tool for S-Cap	Applicable Tubes
S410542A	S-12AL Cap Assy	1 pair	No	12PA tube and 12PE tube
S410532A	S-40AL Cap Assy	1 pair	No	40PA tube and 40PE tube
S308625A	Tool for S-Cap	No	1 set	
S308626A	S-12AL Cap Tool Set	8 pairs	1 set	12PA tube and 12PE tube
S308626B	S-12AL Cap Tool Set	12 pairs	1 set	12PA tube and 12PE tube
S308627A	S-40AL Cap Tool Set	8 pairs	1 set	40PA tube and 40PE tube
S308627B	S-40AL Cap Tool Set	12 pairs	1 set	40PA tube and 40PE tube

\* S-cap consitis of Setscrew, Al stem and Ti Ring as a pair.

\* Tube excluded and sold separately.

### Rotors for Density Gradient Centrifugation

The density gradient centrifugation is useful to separate multiple nano-sized particles simultaneously in the density gradient solution. We offer exclusive rotors, zonal rotor model P32ZT and continuous flow rotor model P32CT, for larger volume process.

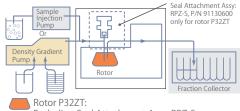

### Zonal centrifugation system : By rotor P32ZT

P3221 P/N:9123160M

In zonal centrifugation, a density gradient is developed within the zonal rotor running at low speed. Next, the samples to be separated are loaded through the center of the zonal rotor. Then increase the speed to the preset high speed to separate the sample into the respective band in the density gradient in the rotor. After separation, separated sample with the density gradient solution is collected through the center by injecting the highest density gradient solution from the outside wall of the zonal rotor while the rotor is running at low speed. Collected sample with the density gradient solution is separated into the fractions. Optical density of each fraction is checked by the spectrophotometer to find the fractions containing the separated samples.

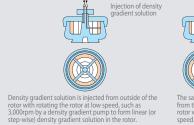

#### System flow diagram

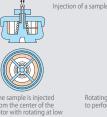

- Excluding Seal Attachment Assy, RPZ-S, P/N 91130600 (sold separately).
- Density Gradient Pump required for density gradient centrifugation as optional.
- Sample Injection Pump, Density Gradient Pump and Fraction Collector not supplied from us. For detail, contact us.

The sample is collected from the center of the rotor

#### **Separation Procedures**

Rotating speed is accelerated to the preset speed to perform the centrifugation for the preset time

### Continuous flow centrifugation system : By rotor P32CT

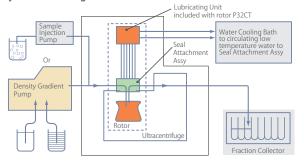

The continuous flow rotor model P32CT, designed for use with himac ultracentrifuges, enables you to perform highly efficient continuous flow separation and purification of large volume samples under high centrifugal force using differential pelleting or the density gradient centrifugation technique.

### Optional 940mL Core Assy: P/N 348333A

For separating samples containing much sediment or performing separation after increasing the density gradient, the optional 940mL Core Assy increases the rotor capacity from 430mL to 940mL. The flow volume performance is about 35% less than that of standard core for 430mL capacity.

P32CT P/N:9122660M

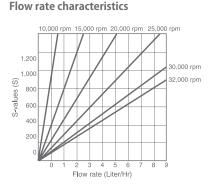

#### System flow diagram

Rotor: P32CT rotor body with 430mL Core, Lubricating Unit, Seal Assembly, Tools (Torque wrench ,etc.), O-ring, Packing, Grease and Logbook (only P32CT with optical adapter).
 Seal Attachment Assy required : To use P32CT with CP-NX, the optional accessory kit is mandatory required (sold separately).
 Optional Accessory Kit exclusively for CP-NX series: P/N S205643A

 Including: Door Assy, Rear Panel and Unit Base.
 Excluding: Sample Injection Pump, Water Cooling Bath, Density Gradient Pump and Fraction Collector. These are not supplied from us. Components within dotted lines are included in the standard accessory of P32CT and Optional Accesorry Kit (sold separately).

Density Gradient Pump: Required for density gradient centrifugation as optional. This pump not supplied from us.

Noise Level	51dB(A) (runnii	ng at max. speed, under in-hou	use test condition)	
Heat Radiation Into a Room	1kW or below			
Cooling System	Thermo-module cooling system (CFC/HCFC/HFC-free)			
Brake System	Regenerative Braking (with energy recovery)			
Control Panel	Touch-sensitive color LCD panel (6.5 inch)			
Data Communication	USB : Host x 1, Device x 1 / LAN x 1			
Rotor Life Management	Automatic Rotor Life Management for rotors with RLM adapter Registered by serial number to the system for rotors with optical overspeed disk			
Dimensions	Width 790 x depth 690 x height 880 mm (depth 890 mm including door cover) From floor, height 925 mm to top of door handle, and 863 mm to table			
Floor area		0.81 m <sup>2</sup> (900 x 900 mm)		
Weight		390 kg		
Power Requirements	Single phase, AC200V, 208V and 220V +/-10%, max. 20A (normally 8A) Single phase, AC230V and 240V +/-10%, max. 16A (normally 7A)			
Installation Environment	Ambient temperature for operation : 2°C to 40°C Ambient temperature for performance guarantee : 10°C to 30°C			
Standard	cCSAus	CE marking complied * certificated for USA/Canada m	nodel only *	
Warranty of Drive Unit		10 years after the shipment	t	
Part No. (Asia/Pacific/Middle East)	911067C1	911068C1	911069C1	
Part No. (EU market)	911067C2	911068C2	911069C2	
Part No. (US/Canada)	911067C3	911069C3		

Remarks :

\*For detail of standard, contact us.
 CP-NX series is not registered as medical device in Japan.
 Due to safety reasons, installation environments, operation environments and conditions may be restricted.

CAUTION:

For safety and proper use of your machine, carefully read and follow the instruction manual.

This catalogue is for international reference and not intended for a specific country.
 Orders are subject to product-availability in each country.
 All specifications are subject to change without advanced notice.
 Actual color may vary from the color of the photos on this catalogue, due to printing conditions.
 Due to safely reasons, installation environments, operating environments and conditions may be restricted.
 Unless specially mentioned, products and/or operation panel of the photos are standard specifications.
